DEFINE “WORK”

How do you define work? Spend some time exploring what your expectations of work are and what role work plays in your life. What are hoping to accomplish in your life through work? Does your definition align with the role work is currently taking in your life? Is your work aligned with who you are? If not, why not?

(*Feel free to get creative here. Write, draw, vision, express and explore this idea in whatever way works best for you.)
